Design & Technology

VISION

Design & making – what could be better?

We want our students to catch our passion for the design process and to develop their creativity and skills – we want to help our learners realise they **can** be the next James Dyson/Vivienne Westwood/Heston Blumenthal…

We aim to teach active lessons that enable learners to be

creative and

independent

We aim to give learners a clear understanding of

transferable skills

– both practical and evaluation/analysis/problem solving

We aim to give learners an understanding of how design is fundamental to everything, the impact it has on the environment, and how it is changing through technology every day
