

# Design & Technology

VISION

Design & making – what could be better?  
We want our students to catch our passion for the design process and to develop their **creativity** and **skills** – we want to help our learners realise they **can** be the next James Dyson/Vivienne Westwood/Heston Blumenthal...

We aim to teach **active** lessons that enable learners to be **creative** and **independent**

We aim to give learners a clear understanding of **transferable skills** – both practical and evaluation/analysis/problem solving

We aim to give learners an understanding of how design is **fundamental** to everything, the impact it has on the **environment**, and how it is changing through **technology** every day
