

Science

Science is a way of thinking – not a collection of facts.

We want to ensure that every student understands the scientific process...

Using this simple method it is possible to move towards a rich and sophisticated understanding of the world around us.

The beauty of Science is that “getting things wrong” is part of making progress. If the data does not fit the theory, then that theory is wrong, and must be improved or rejected.

Every aspect of the modern world owes a debt to the ideas of scientists. We endeavour to ensure that when students leave Gosford Hill School they have the skills and resources necessary to contribute to this ever expanding field – whether at University, in employment, or simply taking pleasure in finding things out.
